As a results-driven Junior Data Analyst with a robust background in software engineering, I bring over two years of experience in leveraging advanced data analytics, process automation, and workflow optimization to deliver high-impact solutions. At Carelon, I spearheaded the development of innovative automation tools that reduced manual Excel tasks by 95%, significantly boosting operational efficiency. Additionally, I led a key project that optimized inventory management processes, improving daily efficiency by 20-30%. My expertise in Python, SQL, and Excel has empowered me to tackle complex data challenges and drive measurable improvements in business operations.

I am passionate about utilizing data to solve real-world problems and uncover actionable insights that inform strategic decision-making. With a keen eye for detail and an analytical mindset, I have consistently demonstrated the ability to transform raw data into meaningful, results-oriented solutions. Organization's reputation for driving innovation through data resonates with my own passion for data-driven outcomes, and I am eager to contribute my technical skills, creativity, and problem-solving abilities to help your team achieve its goals. I am confident that my experience in automation, data analysis, and workflow optimization will add significant value to your organization.

Sincerely,

Bibek Lamsal
